3.44

Louis is not womet. There is an essential difference in that exchange needs to hopen all-at-some to prevent weigh behoviour, in part because it is really a penentage - based soperation in terms of the balances.

Transfer however can be done assymmonously and superation. It is no big problem if the withdown happens boday, and the deposit homorrow, even with other transactions interessed except for the surformer's patience!

In the words, the diff rabulation is an unsumbered success in exchange freeze is recipility between the personals.

keep in mind that this assumes amount in withdownal aurorate is always by enough; Thunis, the withdowns may fail, and the two transfer providing produce different penult. Though still perhaps, equal to some sequential execution!

In an intend bank perform atomic francher mark well be perfemble. Though home to atomize wer second banks?
